## V2.2 (2023-09-22)

### BREAKING CHANGES

- Dropped optional field *ThirdParty* from *Container\_Work\_EstimateLineProposal* in favor of new *percentage* fields (see below)
- Deprecated *OTF216*

### Changes

- **Support added for new common depot tank container order status field**
  - Added global tank container depot order status enum field to *OrderStatusInfo* (used by most messages)
- **M&R Estimates now have more detail**
  - Added optional *EstimatorName* field to *(Tank)Container\_Work\_EstimateStatusInfo* (used by *Message\_(Tank)Container\_Work\_Estimate* and *Message\_(Tank)Container\_StatusUpdate\_Work*)
  - Added optional *LessorPercentage* field to *Container\_Work\_EstimateLineProposal*

- Added optional *LesseePercentage* field to *Container\_Work\_EstimateLineProposal*
- **Better way to communicate who is operationally responsible for performing processes**
  - Added optional *StartedBy* field to *Container\_ServiceProgress\_DateInfo* (all status update messages)
  - Added optional *FinishedBy* field to *Container\_ServiceProgress\_DateInfo* (all status update messages)
  - Added optional *CancelledBy* field to *Container\_ServiceProgress\_DateInfo* (all status update messages)
- **Improved sample file content**

## V2.1.6 (2023-09-13)

### BREAKING CHANGES

- **Dropped TankContainer\_Inspection.InspectionResultsInfo.InspectionDate**  
This was done due to the fact that in different cases the complete dates in the InspectionResult element are considered to provide the context of the inspection and the associated date (such as *InspectionResultsInfo.Inspections.LeakproofnessTest.InspectionDate*)
- **Improved Support for FacilityCodes**
  - Renamed OrderInfo.SupplierLocationID to SupplierFacilityID
- **OTF is now exclusively a set of B2B I/O formats, therefore:**
  - Fully removed all invoice file definitions datamodels versions, please consider using UBL instead
  - Fully removed all Operational Technology (OT) datamodels from earlier versions, this should be handled as a contract between systems and is not considered B2B
  - Fully removed all ERP data synchronization datamodels from earlier versions, this should be handled as a contract between systems and is not considered B2B

### Changes

- **Improved Support for FacilityCodes**
  - Added OrderInfo.SupplierBICFacilityCode (ability to explicitly add a [BIC facility code](#))
  - Added OrderInfo.ClientBICFacilityCode (ability to explicitly add a [BIC facility code](#))
  - Added OrderInfo.ClientFacilityID

## V2.1.5 (2023-08-30)

### BREAKING CHANGES

- Fixed an issue where MessageHeaderInfo.ContactInfo was deeply nested

### Changes

- Fixed an issue where allfields sample files OTFMessage and OTFVersion fields would be incorrect

## V2.1.4 (2023-08-29)

- Fixed an issue where Message\_TankContainer\_PreNotification had no Attachments element

## V2.1.3 (2023-08-29)

- Sample file improvements

- Sample files now have real-world examples, as well as full field examples containing dummy data in each field (which may not correspond with proper business logic)
- Sample JSON files no longer contain "specified" fields (please check the JSON settings in the example source code for serialization/deserialization config)
- Added deserialization example code for XML and JSON to the project (for developers)
- Changed TXT files to README.MD which is better readable on Github

## V2.1.2 (2023-08-23)

### BREAKING CHANGES

- JSON: All enums in the sample project and sample files are now exported as string instead of 0-based enum index

## V2.1.1 (2023-08-22)

### BREAKING CHANGES

- Finished migration from ContainerInfo to TankContainerInfo in StatusUpdate messages (cleaning, heating, inspection, transshipment)
- Removed duplicate Container\_Work\_EstimateStatusInfo element from Container\_Work\_EstimateStatusInfo for easier use
- Fixed an issue with the Container\_Work\_EstimateLineProposal Quantity field

### Changes

- Added field OTFMessage to MessageHeaderInfo
- Added general Category and LaborRate fields to Message\_Container\_Work (Tank already had them)
- Fixed an issue where Estimate sample files would not contain quantities and totals
- Fixed an issue where generated OTF21 sample files would have the wrong version number
- Various small improvements of the sample files

## V2.1 (2023-08-03)

### BREAKING CHANGES

- **Improved folder structure**
  - Folder structure is now version-based to improve backward compatibility
- **Improved naming conventions**
  - .cs release file now has "autogenerated\_" as a prefix
  - .xsd release file now has "autogenerated\_" as a prefix
  - .dll release file now has "autogenerated\_" as a prefix
  - Updated C# solution accordingly
- **Improved separation between "containers" and "tank containers"**
  - Modified Message\_Container\_PreNotification, removed all tankcontainer segments
  - Modified Message\_Container\_StatusUpdate\_Storage\_Arrival, changed ContainerStorageArrivalInfo to Container\_StatusUpdate\_Storage\_Arrival
  - Modified Message\_Container\_StatusUpdate\_Storage\_Available, changed ContainerStorageAvailableInfo to Container\_StatusUpdate\_Storage\_Available

- Modified Message\_Container\_StatusUpdate\_Storage\_Departure, changed ContainerStorageDepartureInfo to Container\_StatusUpdate\_Storage\_Departure
- Removed TankContainerInfo from Message\_Container\_Work\_Estimate to avoid spaghetti
- **Improved message header Contact information**
  - MessageHeader.ContactName is now in MessageHeader.ContactInfo.Contact.Name
- **Name change TankContainerInfoInspectionInspectionScope**
  - TankContainerInfoInspectionDatesInspectionScope was renamed to TankContainerInfoInspectionDatesLastInspectionScope due to XSD 2 C# autogeneration shenanigans. Will look into it.

## Changes

- **Housekeeping**
  - Added instructions for interface mapping
  - Added separate XSD files per message type for better mapping support
    - Moved combined files to *bin\combined (cs, dll, xsd)* folder
    - Added *bin\separate (xsd)* folder
    - Added generator for separated XSD files
  - Improved separation between “containers” and “tank containers”
    - Added Message\_TankContainer\_PreNotification
    - Added Message\_TankContainer\_StatusUpdate\_Storage\_Arrival
    - Added Message\_TankContainer\_StatusUpdate\_Storage\_Available
    - Added Message\_TankContainer\_StatusUpdate\_Storage\_Departure
    - Added Message\_TankContainer\_Work\_Estimate
    - Updated sample generator accordingly
    - Updated samples accordingly
  - Various improvements and instructions for easier creation of new OTF releases
- **General improvements**
  - Added ability to add remarks to all messages
  - Added ability to add remarks to all Container\_ServiceRequests
    - Added Remarks to Container\_ServiceRequestInfo
  - Added ability to add attachments to all messages
  - Added ability to add ClientPurchaseOrderReferences
    - Added ClientPurchaseOrderReference to Container\_ServiceRequestInfo
    - Added ClientPurchaseOrderReference to (Tank)Container\_StatusUpdate\_Storage\_Arrival
    - Added ClientPurchaseOrderReference to (Tank)Container\_StatusUpdate\_Storage\_Available
    - Added ClientPurchaseOrderReference to (Tank)Container\_StatusUpdate\_Storage\_Departure
    - Added ClientPurchaseOrderReference to Container\_ServiceProgressInfo (used by Message\_TankContainer\_StatusUpdate\_Cleaning, Message\_TankContainer\_StatusUpdate\_Heating & Message\_TankContainer\_StatusUpdate\_Inspection)
  - Added ExchangeRate fields to LocalizationInfo
- **Pre-notification improvements**
  - Added more options to Container\_PreNotificationTypes for better context of PreNotifications
    - Added OnHire, OffHire to Container\_PreNotificationTypes
  - Added ability to add seals to TankContainer\_StateInfo
- **Depot Services improvements**
  - Improved ability to return Haulier info on sending Arrival and Departure status updates

- Modified Message\_Container\_StatusUpdate\_Storage\_Arrival, added Container\_HaulierInfo segment
- Modified Message\_Container\_StatusUpdate\_Storage\_Departure, added Container\_HaulierInfo segment
- **Heating improvements**
  - Added fields to TankContainer\_ServiceRequest\_Heating
    - RequestedHeatingMethod, RequiredHeatingTemperatureMeasurementMethod, MaximumPressure, MaximumContactTemperature, MinimumTemperature, MaximumTemperature
- **M&R Estimate improvements**
  - Added ability for Estimate Total to Message\_TankContainer\_Work\_Estimate
    - Added LaborRate to Message\_TankContainer\_Work\_Estimate
    - Added EstimateLinesProposalTotal to Message\_TankContainer\_Work\_Estimate
  - Added Category field to Message\_TankContainer\_Work\_Estimate
  - Improved Container\_Work\_EstimateLines
    - Added GeneralCodes.ComponentCode to Container\_Work\_EstimateLines
    - Added ability to add attachments to Container\_Work\_EstimateLines
- **Chemical Product Data**
  - Added ProductDetails Segments to ProductInfo
    - Manufacturer, SDSURL, PureProductDetails, MixtureProductDetails, HazardousProductSafetyClassifications, PhysicalChemicalPropertiesInfo, FireAndExplosionDataInfo, EmergencyContactInfo

## Known Issues

- Some XSD definitions could use optimizations due to nesting
- Due to order of autogeneration, sometimes names change leading to unwanted low impact breaking changes in new versions of OTF

## V2.0 (2023-02-22)

### BREAKING CHANGES

OTF has been fully redesigned. This has the following benefits:

- Unified structure (all message headers are the same)
- XSD makes sure developers can start quickly, since it is mostly its own documentation
- Various requests for less generic fields (especially dam, mat, loc codes)
- OTF-Invoice removed: please use UBL Invoice format ([link](#))

### Changes

- New formats introduced
  - PreNotification messages  
(redelivery notification, release notification, accompaniedCleaning, quickRepair, heating, etc.)
    - Message\_Container\_PreNotification
    - Message\_Container\_PreNotification\_StatusUpdate
  - Container services StatusUpdate messages
    - Message\_Container\_StatusUpdate\_Storage\_Arrival
    - Message\_Container\_StatusUpdate\_Storage\_Available
    - Message\_Container\_StatusUpdate\_Storage\_Departure
    - Message\_TankContainer\_StatusUpdate\_Cleaning
    - Message\_TankContainer\_StatusUpdate\_Heating

- Message\_TankContainer\_StatusUpdate\_Inspection
- Message\_TankContainer\_StatusUpdate\_Transshipment
- Work messages (modifications & repair)
  - Message\_Container\_Work\_Estimate (can be annotated and authorized)
  - Message\_Container\_StatusUpdate\_Work
- PeriodicInspection Messages
  - Message\_TankContainer\_InspectionReport
- XSD available
- C# class available
- Deprecated all versions up until OTF V1.3
  - Formats deprecated and replaced by new structures
    - OTF-Gate Move
    - OTF-M&R Estimate Saga
    - OTF-Periodic Inspection Certificate
    - OTF-Pre announcement
    - OTF-Workflow Status Information
  - Formats on-hold for now (since they do not belong in the supply chain)
    - OTF-Cleaning Audit
    - OTF-Debtor Data
    - OTF-Equipment Data
    - OTF-Gate Drivetrrough Audit
    - OTF-Heating Audit
    - OTF-Product Data
    - OTF-Spare Part Data
    - OTF-Spare Part Purchase Order
  - Formats dropped
    - OTF-Invoice removed: please use UBL Invoice format ([link](#))

## V1.32 (2023-02-22)

- Added field *Certificate > CertificateData > Characteristics > ISO6346SizeTypeCode (string)* to *Periodic Inspection Certificate* message

## V1.31 (2023-02-10)

- Added optional customer suborder reference field (usually reserved for authorization) to Workflow Status Information

## V1.3 (2022-11-01)

- Added "Periodic inspection certificate" format

## V1.2 (2022-05-13)

- Added "About" information
- Added Changelog
- Added "History of interfaces" document for clarification
- Added "Interface checklist" for easier coöperation and better explanations for project managers and higher-up stakeholders

- Gate Drivethrough Event definition updated (clarified & changed some formats)
- Cleaning Maintenance definition added
- Pre announcement updated
  - Documentation improved
  - Now supports polymer cleaning request flag
  - Extra wishes now supports quantity
  - Extra wishes now supports explicit cleaning method code
- Spare Part Purchase Order updated (documentation improved with some specific outbound clarifications)

## V1.1 (2021-11-15)

- Debtor Data definition added
- Product Data definition added
- Heating Data definition added
- Gate Drivethrough Event definition added
- Pre announcement updated (main service flags are now deprecated)
- Gate Move updated (some explanations added)
- Workflow Status Information updated (some explanations added)
- M&R Estimate Saga updated (improved documentation, added support for lessor counteroffers)
- Invoice updated (added VAT rounding strategy variant)
- Spare Part Purchase Order updated (added support for inbound (delivery), made separation between inbound (delivery) and outbound (spare parts supplier))

## V1.0 (2021-08-27)

- Initial release
